

# Truck Detective Project Meeting

## |MINUTES

Meeting date: *03/26/2021* | Meeting location: *Zoom*

Meeting called by Ben Ruelas

Type of meeting Team Meeting

Note taker Dorian Dhamo

### Attendees:

- Ben Ruelas
- Dorian Dhamo
- Hy Dang
- Minh Nguyen
- Trang Dao

## AGENDA TOPICS

### Google Cloud VM Set Up

- Greg explains that the google cloud can be accessed through the fort capital accounts. However , after multiple tries on our end (students) the accounts were created but were inactive for us to be able to use them.
- The set up part not going through due to permission errors. After the client realized what was going on with the accounts and why we couldn't access them, he able able to set the right permission firewalls in order for us to access the VM
- The permissions being updated and us being able to access the account.
- The account not having any funds in it. In order to create the VM we need to have access to a banking account (any account that had funds in it) so after realizing that without funds we couldn't continue any further,

Greg connected all the students accounts to have access to funds.

- The student accounts being connected to an account with funds.  
This was the first step to starting to have a VM running.
- Deciding with GPU to chose out of 8 different ones (expensive to cheap)  
After a few trial runs on some different GPU we were able to figure out which was a better fit for us.
- Following the clients recommendation and picking one that was affordable yet effective.
- Choosing a VM with 15 GB GPU
- Concluding the meeting with Greg
